- Christian Fenn, Instrucot at BCIT

## SUMMARY

I'm a Vancouver-based software engineer who specializes in building and designing exceptional online experiences. Currently, I'm focused on the newest Web development technologies. A goal-oriented Web Developer seeking to advance both front and backend knowledge in a professional career in order to use technical proficiency and creativity to develop engaging user experiences. Enthusiastic and detail-oriented team player ready to utilize skills to contribute to helping the success of the organization.

## EXPERIENCE

### Web Developer at ICAN.

March 2019 – September 2020

- Created scalable multiple-responsive websites for mobile and desktop devices using HTML, CSS, and React.
- Worked with frameworks and libraries in applications.
- Worked closely with senior developers, product owners, software architects, and user experience designers to create custom and reusable components to improve application scalability.
- Implemented new features using modern javascript and React in order to swap the legacy code into modern and component-based modular code to increase reusability and user satisfaction.

### Junior Developer at Varanegar Novin

October 2017 – February 2019

- Assisted Developers in creating and maintaining web applications, to increase user engagement and user experience improvement.
- Reviewed designs created by UX/UI designers to ensure that they are compatible with the website's layout or design scheme.
- Learned and applied new technologies and techniques, including Git version control
